Mission

Proactive, detail oriented, and results based individual aspiring to be a front-end web developer for Mindslap.

From the moment I produced "Hello World" in the console of my first application, I knew I was hooked into the world of software development. But software development has never been "just a job" for me, it's offered me an engaging challenge to continually learn and improve my skills in creating high-quality software. What started with a simple "Hello World" has become a full-fledge passion that only gets more exciting as the years go by.

Below you'll find projects I've completed that showcase my skills and general background in developing software.

Projects

Ajax Flickr Photo Search

A photo search web app that utilizes flickr's search api. Built using html , css and JS.

Link to Code : https://bit.ly/2Ei9VwS

Link to Site: https://bit.ly/2BbHhKl
